<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
----------------------	----------------------	----------------------	----------------------	----------------------	----------------------

*Wattage total* -

*Running time per day*<sup>+</sup> -

average of  hours

<sup>+</sup>Some office environments run for 24 hours, Business - average 12 hours, Home - average 5 hours

*Your price per KWhr* -

£  .  p per KWhr

Check with your energy provider for your price per KWhr. and enter above.

Now email us at [energycalculations@imetatrontechnologies.com](mailto:energycalculations@imetatrontechnologies.com) to find out how much your current lighting costs you and how much you can save by switching to highly energy efficient LED lighting technology. We can help you save huge amounts of energy; money and time now, so don't wait until the last moment. You will be required to switch to alternative lighting by April 2015 or face prosecution. Government phase-out of energy hungry incandescent lighting already began in April 2009. We will try and beat any genuine quotations you have received for your LED lighting replacement.

If you do not see the type of base you require call us and we will help to identify your base type.  
Many base types are available.

LED LIGHTING FOR HOME, BUSINESS & COMMERCIAL APPLICATIONS
